CGPA Formula	Cumulative Performance – Cumulative Grade Point Average (CGPA) The overall Cumulative Performance at the end of each semester/ trimester/ term is calculated as a weighted average in the range of 2 to 10 as under and is called Cumulative Grade Point Average (CGPA). $CGPA = \frac{u_1g_1 + u_2g_2 + u_3g_3 + \dots + u_n g_n}{u_1 + u_2 + u_3 + \dots + u_n} = \frac{\sum_{i=1}^n u_i g_i}{\sum_{i=1}^n u_i}$ where n is the number of all courses (with letter grading) attended and letter grade obtained from the entry to the University till the point of reckoning, u_i and g_i are respectively the credits/units attached to the i-th course and grade obtained by the student in the i-th course. The courses which are evaluated by Non-Letter Grades are not considered in the calculation of CGPA. It is also used to award the Division, if any. It is calculated up to two decimal places by truncation and not by rounding off.
